AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method for treating inflammatory disease of the external segment or the anterior segment of the eye, which comprises administering to the eye an aqueous eye drop comprising 2-amino-3-(4-bromobenzoyl)phenylacetic acid or its pharmacologically acceptable salt or a hydrate thereof, and at least one organic amine selected from the group consisting of arginine, histidine, aspartic acid, glutamic acid, serine, threonine, cysteine, phenylalanine, isoleucine, monoethanolamine, diethanolamine, triethanolamine, trometamol, (2-4-(2-hydroxyethyl)-1-piperazinyl]ethanesulfonic acid, 1,4-bis(2-sulfoethyl)-piperazine, ethylene diamine, trimethylene diamine, N,N'-bis(3-sulfopropyl)ethylene diamine, aminomethylsulfonic acid and aminoethylsulfonic acid once a day, and maintaining a therapeutically effective concentration of 2-amino-3-(4-bromobenzoyl)phenylacetic acid in the anterior aqueous humor of the eye.

2. (Cancelled)

3. (Previously presented) The method according to claim 1, wherein the concentration of 2-amino-3-(4-bromobenzoyl)phenylacetic acid or its pharmacologically acceptable salt or a hydrate thereof in the aqueous eve drop is 0.01 to 0.5w/v%.

4-9. (Cancelled)

- 10. (Currently amended) The method according to claim 1, wherein the organic amine is aminomethylsulfonic acid or aminoethylsulfonic acid, and its concentration of the organic amine is 0.05 to 5 w/v%
- 11. (Currently amended) The method according to claim 10 claim 1, wherein the organic amine is aminoethylsulfonic acid.

12-35. (Cancelled)
